# We are extremely proud of the work our students produce and the wide range of scientific skills they develop as our courses are taught in a very practical way.

Our teachers come from a wide range of industrial backgrounds and are able to offer students real-life context to learning. Graduating students have gone on to study Medicine; Veterinary Science; Pharmacy; Radiography; Electrical, Aerospace, Automotive and Mechanical Engineering; Biomedical Sciences and lots of other courses, many at Russell Group universities. We encourage our students to take up a range of opportunities, including NHS experience through our volunteering links; becoming part of national data collection on climate change with the Peak District National Parks or gaining one of the prestigious placements or with the Nuffield Foundation working with university professionals on real projects.

# **BIOLOGY**

#### A LEVEL - 2 YEARS

Katie - Silverdale School

Entry Requirements: 5 GCSEs at grade 4-9 (A\*-C) including English, plus Maths + 2 Science GCSEs at 6 (B)

# What will I study?

Biology is related to many areas of our life including food safety, agriculture, medicine, sport and scientific research. You will learn about the nature of life from the molecules and chemicals that life is built upon to the way populations of the world's living organisms develop and live together. Biology

is a very hands-on subject and there will be regular practical work in class. Your study will involve some dissection of animal and plant material. Data analysis also forms

an integral part of the course so you need to be confident using Maths. If you are not studying A Level Chemistry, you will need to work with your Biology teachers to cover the basic biochemistry needed for this course.

## How will I be assessed?

Examination and practical endorsement.

### What can I do next?

Biologists can be found in many places, including medicine, dentistry, physiotherapy, veterinary medicine, laboratory work, forensics, pathology and nursing. Biology is also a well respected A Level for a wide range of non-science related courses and careers because it helps you to develop analytical, practical and investigative skills.

# **CHEMISTRY**

#### A LEVEL - 2 YEARS

Entry Requirements: 5 GCSEs at grade 4-9 (A\*-C) including English, plus Maths + 2 Science GCSEs at 6 (B)

# What will I study?

Chemistry allows you to learn more about the structure of the world around you through experiments and find out about the chemical reactions that we encounter every day, whether it be in breathing, baking or driving a car. You will study atomic structure, bonding and the periodic table. Other key topics studied include chemical kinetics, equilibrium and molar calculations. You will develop new practical skills in organic synthesis, extraction and analysis whilst being introduced to new topic areas such as Transition Metals.

### How will I be assessed?

Examination and practical endorsement.

"Chemistry is amazing. From naming and drawing organic molecules, to maths and equations, this subject has it all." Abdulsalem - Fir Vale School

### What can I do next?

Chemistry develops lots of skills that are relevant for employment or study at a higher level, such as problem solving, scientific method, practical work and use of number. Chemistry is essential if you want to study medicine, dentistry, pharmacy, forensic science or veterinary science at a higher level. Other popular choices for progression include chemistry, chemical engineering and biochemistry. Chemistry is often a desired choice for entrance to other science-based courses and occupations.

# **PHYSICS**

#### A LEVEL - 2 YEARS

Entry Requirements: 5 GCSEs at grade 4-9 (A\*-C) including English, plus Maths + 2 Science GCSEs at 6 (B)

# What will I study?

Physics gives you the opportunity to investigate and understand some of the fundamental laws of the universe, ranging from the tiniest particles of matter to vast star systems. You will cover topics such as mechanics, subatomic particle physics, electricity and theory of waves. You will also study topics which include gravitational, electrical and magnetic forces, nuclear and thermal physics and oscillations.

# How will I be assessed?

Examination and practical endorsement.

### What can I do next?

A Level Physics is a good starting point for further study of natural science and engineering related courses. It also supports progression into subjects such as medicine and radiography and is a good background for courses in many other fields, especially those that rely on numeracy and logical thought.

# APPLIED SCIENCE

#### **CHOOSE EITHER AN EXTENDED DIPLOMA. DIPLOMA OR EXTENDED CERTIFICATE** (WORTH 3, 2 OR 1 A LEVEL'S)

Entry Requirements: 5 GCSE's at grade 4-9 (A\*-C) including English, Maths + Science

that allow you to learn a wide range of skills. The reason why I chose Applied science is because I have always been passionate about science."

Omar - Tapton School

# What will I study?

You will study all of the main sciences, Chemistry, Biology and Physics in detail. You will learn about how science knowledge and skills are used in a variety of scientific workplaces, analytical sciences and biomedical sciences.

#### How will I be assessed?

Examinations and coursework.

### What can I do next?

Our BTEC Applied Science students have gone on to university to study gateway to medicine, chemical engineering, pharmaceutical science biomedical science, medical genetics, health and human sciences, human biology, biochemistry, podiatry, forensic science, biology, biosciences, genetics and molecular biology, microbiology and molecular biology, veterinary science, wildlife conservation, radiotherapy and radiography. Many of these students have gone to the prestigious Russell Group Universities. Students have also taken up apprenticeships including microbiology and surgical instrumentation.

understandina."

Lucy - Ecclesfield

# APPLIED SCIENCE

#### **BTEC LEVEL 2 EXTENDED CERTIFICATE - 1 YEAR**

Entry Requirements: At least 2 Grade 3's (D) at GCSE, including Science

# What will I study?

You will carry out experiments and learn how science is used in different jobs. The course covers Biology, Chemistry and Physics and the skills needed by scientists to collect, analyse and interpret data. Assignments are based on real applications of science in areas such as forensic science, food technology and environmental science.

#### How will I be assessed?

Examinations and coursework.

### What can I do next?

Students from this course have gone on to do the BTEC Level 3 Extended Diploma in Applied Science.

"I have chosen this course because I love Science subjects so then I want to go to level 3 Science and finish my course with a high grade to go to university." Alisha - Fir Vale School

# **ENGINEERING**

#### **BTEC LEVEL 3 EXTENDED CERTIFICATE - 2 YEARS**

Entry Requirements: 5 GCSEs at grade 4-9 (A\*-C) including English, Maths + Science

EQUIVALENT TO 1 A LEVEL

# What will I study?

You will learn about mechanical and electrical engineering principles and applications and how to solve real life engineering problems. The course involves practical work on electrical circuits, forces, materials testing and servicing engineered components.

#### How will I be assessed?

External assessments and internal assignments.

### What can I do next?

You can progress to study engineering at university or apply for technical apprenticeships or technician jobs in the engineering industry.

# **ENGINEERING**

#### BTEC LEVEL 2 EXTENDED CERTIFICATE - 1 YEAR

Entry Requirements: At least 2 Grade 3s (D) at GCSE, including Science and Maths

You will learn about the Engineered World and how engineering contributes to a sustainable future. You will study engineering materials, mechanical and electrical principles and computer aided design (CAD) and manufacture (CAM). You will learn how to apply these principles to solve real life engineering problems such as in vehicle engines and other systems. The course involves practical work on forces, material testing and servicing engineered products as well as manufacturing an engineering component.

## How will I be assessed?

External and internal assignments, examinations and coursework.

### What can I do next?

You can progress on to the BTEC L3 Extended Diploma in Applied Science, L3 Extended Certificate in Engineering, apprenticeships or technician jobs in the engineering industry.
